PROFESSIONALS

CHASE Professionals was founded in 1979 as a full-service recruiting firm. CHASE is focused on hand-selecting the top talent for our clients. It is our objective to partner with your organization to assist in building winning teams.

CHASE Information and Technology is located in Atlanta & recruits nationwide for IT professionals. Our technical recruiters are highly skilled at identifying top talent and are members of TAG as well as other networking organizations. CHASE IT concentrates on identifying the top candidates in IT infrastructure, development and business intelligence.

Services We Provide

Direct Hire Recruiting & Placement – Direct Hire search is the best method for obtaining top talent for your organization. Although unemployment numbers seem to increase daily, the top industry professionals are still employed. Direct Hire allows you to attract these passive job seekers to your organization.

Contract Placement – Contractors are great for companies with project-based or part-time work. CHASE retains the employee on our payroll & removes the burden of your company having to hire a full-time employee.

Contract-to-Hire – Contract-to-Hire placements work well for companies that are looking to retain talent, but want to ensure they are a match before hiring them permanently.

Why work with CHASE?

Customer Service – CHASE understands that candidates are just as important as clients. We are dedicated to treating all parties with the highest level of service throughout the hiring process.

Testing & Technical Screening – CHASE utilizes Prove-It testing with a database of over 600 skill assessments. Our recruiters are trained on the latest technologies & many have backgrounds in IT. We know what information to ask to insure candidates are a match for your organization.

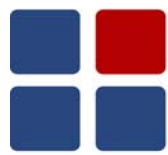

Guarantee – Direct Hire placements include a standard 90 day guarantee period. If the candidate does not work out during that time, CHASE will replace them free of charge.

Reference Checks – CHASE performs reference checks on all candidates prior to employment.

Technology – CHASE has gone paperless through online applications. CHASE enables employers to approve timesheets online & candidates can check their pay stubs through our WebCenter.

Networking – CHASE Recruiters are constantly networking through TAG, LinkedIn and other outlets to ensure we reach candidates you won't find on the job boards.
